

WHY VERTEK NETWORK MIGRATIONS [VNM]

- Proven Migration Management: POP to POP, Last-mile and Win Backs
- Highly Experienced Team of Migration and Project Management Experts
- Seamless Integration with Legacy and New Inventory and Ordering Systems
- Accurate and Extensive Project Tracking of Key Performance Indicators [KPIs]
- Efficient and Reliable Transitions, with Increased Customer Satisfaction

VNM

Veritek Network Migrations is a project-based service that tackles the challenge of reconfiguring large complex carrier networks or migrating major corporate accounts with minimal disruption to client and end-customer operations. Veritek's complete network migration service offers telecom service providers comprehensive project management and planning to ensure migrations are completed on time and within budget. Beginning with the establishment of business goals and master-work schedules, our project managers provide hands-on supervision of tactical operations. Veritek provides ongoing, expert technical advice and guidance, along with continuous reporting, throughout the lifecycle of the project.

GAIN

EFFICIENCY | CAPACITY | EXPERTISE

VNM PROVIDES

- Implementation of network changes with critical speed, accuracy and efficiency
- Cost savings between 25-40%
- High-quality provisioning and order management
- Seamless integration to legacy systems and customer-care operations
- On-demand access to telecom consultant and technicians

- Team-based, work-centered environment
- Enhanced end-customer service experience
- Regular metrics and communication of project status
- Professional customer interaction; understandable communication packages

HOW VNM WORKS

- GATHERS—Veritek's technical consultants gather baseline data, provide a baseline analysis of the network landscape and conduct a review of relevant source materials for network components, including:

NETWORK DIAGRAMS, REGULATORY BOUNDARIES, TRANSPORT CIRCUITS, NODES, EQUIPMENT

- PROVIDES—Veritek's experts, who establish the best approach to meet goals
- ENSURES—seamless migration from beginning to end
- CREATES—database for tracking critical customer and project information
- BUILDS—fail-safe environment that addresses adverse impact on customer operations
- ESTABLISHES—efficient channels of customer communication, synchronizing anticipated network changes
- PROVIDES—up-front training, scripts, sales and marketing materials for improved customer service.
- MINIMIZES—customer and network impact
